

WIND

Wind Direction Transmitter First Class

Part number: 4.3151.00.020

Special characters are a defined and optimised, dynamic behaviour as well as:

- High level of measuring accuracy and resolution
- High damping ratio at a small delay distance
- Low starting threshold
- Very low power consumption
- No wear of the potentiometer due to mechanical stress
- Overvoltage and reverse polarity protection

The measuring value is available at the output as analogue signal. The output signal can be transmitted to display instruments, recording instruments, data loggers as well as to process control systems. For winter operation the instrument (4.3151.00.x2x) is equipped with an electronically regulated heating.
